SUCCESS STORIES

DATA CHECK:

On an average, processing over 600,000 candidates every year.

Effectively conducting the entire process for more than 7 years.

PROCESS:

Taking care of every module in the recruitment process and automating crucial areas to ensure greater confidentiality and improved transparency of the overall process, thereby providing error free results in minimal time.

RESULTS:

Examination process was streamlined using TRS unique solutions and this led to a 35% decrease in process time and accurate recruitments.

Starting from online registration, OMR entrance tests, using On Screen evaluation for subjective exams till results hosting online, TRS offers the complete package as an end to end solution.

End to end Exam Automation being successfully conducted for a Large Recruitment Board in India.

- Online application hosting done in a dedicated server to handle heavy traffic. Integrating payment portals with ease and also providing dedicated portals for banks/post offices.
- OMR sheet evaluation done using high speed document scanners coupled with eXtractPro software from TRS which will give immediate results.
- Subjective exams evaluated on the computer screen with the help of TRS OSM software eMarquer. With a unique process of digitisation of booklets, TRS can ensure that the images are of high quality and the possibility of mixup in booklet sheet is nil.

Recruitment exams in general involve year long processes which go on for different posts within the department to fill up vacancies. With the rising number of candidates appearing for these exams year on year, the recruitment bodies need to involve the latest technology to handle the huge amount of data with ease. TRS has been constantly evolving its products to suit the market demand and this has enabled us to provide high quality service in a cost effective manner.

Every examination process has a registration phase, where applications need to be hosted online and a window is given for the students to upload files and make payments. The complete application module is supported by highly trained personnel on the backend. Once the application process is complete, examinations can be of both objective or subjective type. In the case of objective exams, OMR sheets are provided for the students to shade answers, and this is processed using high speed OMR hybrid scanners to tabulate the results within a couple of weeks depending upon the volume. Subjective examinations also can be evaluated using TRS eMarquer, which reduces the time taken and is also more efficient in providing error free results. The user friendliness and modularity of the software paved way for the success of this process.
